Telegram: <https://t.me/yarche551>

Frontend Developer (Junior). 3rd-year student at Moscow Aviation Institute (MAI). Focused on building responsive and user-friendly web interfaces using JavaScript and Modern CSS. Proficient in reading technical documentation in English (Intermediate level). Passionate about clean code and rapid learning of new technologies.

Projects & Education

Landing "FURNITURE" • Studying

March 2026 • 3 weeks | Moscow, Russia

- Architected a modern landing page using a professional development workflow with [Node.js](#) and npm.
- Configured and optimized the project build using Webpack, ensuring efficient asset bundling and code minification.
- Rapidly styled the entire interface using Tailwind CSS, implementing a utility-first approach for clean and maintainable styles.
- Maintained a structured codebase that allows for easy scaling and fast deployment of the application.
- GitHub code - https://github.com/Yarche551/tailwind_homework

Project "Dostaffkin" • ITlogia-intensive

March 2026 • 2 weeks | Moscow, Russia

- Developed a functional web application interface from scratch using JavaScript (ES6+) and modern CSS techniques.
- Implemented responsive web design to ensure the application works flawlessly across mobile, tablet, and desktop screens.
- Utilized Angular components and services (or your specific stack) to manage application state and user interactions.
- Integrated third-party libraries and tools (e.g., Tailwind CSS, npm) to speed up development and improve UI consistency.
- GitHub code - <https://github.com/Yarche551/dostaffkin>

Landing Night Light • Studying

January 2026 ~ February 2026 • 2 months | Moscow, Russia

- Engineered a visually striking landing page with a focus on high-quality dark mode aesthetics and lighting effects.

- Leveraged CSS animations and transitions to create a premium feel and guide the user's attention to key products.
- Developed a fully responsive layout that adapts fluidly to various screen sizes, maintaining visual impact on mobile.
- Optimized image assets and SVG icons to ensure rapid page load times without compromising visual quality.
- Integrated JavaScript-based UI components, such as product galleries or interactive modals, to improve engagement.
- GitHub code - <https://github.com/Yarche551/nightlights>

Landing "Macaroons" • Studying

January 2026 • 3 weeks | Moscow, Russia

- Developed a high-fidelity, multi-section landing page based on a Figma design mock-up.
- Ensured 100% pixel-perfect implementation using semantic HTML5 and advanced CSS3 features (Flexbox, Grid).
- Implemented interactive elements and smooth animations using JavaScript to enhance the overall user experience.
- Practice layout skills and basic programming on JS.
- GitHub code - <https://github.com/Yarche551/Macaroons>

Education

Moscow Aviation Institute

System Analysis and Management (27.03.03) • 2023 - 2027

- Majored in System Analysis and Management at MAI, focusing on Information Systems and Software Development.
- Actively participating in technical workshops and academic projects related to algorithm design and web technologies.
- Developing key skills in logical problem-solving, structured programming, and system architecture, which I apply to my frontend development work.
- Gained experience with C++ and SQL through academic coursework.

Skills

- Frontend: JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, BEM.
- Build Tools: Vite, Webpack, npm.
- Development Tools: Git, GitHub, Node.js (Basic), Figma, Photoshop.
- Business & Analysis: Competitor Analysis, Business Research.

Languages

- Russian
- English
